SUMMARY

About Me

Currently undertaking a degree in Computer Science, I am very passionate about building engaging and intuitive web apps. Possessing front-end development skills – HTML, CSS, Javascript and frameworks like React and NodeJS, developing UIs does not pose a challenge. Few of the successfully made projects include portfolio website, e-commerce website and a blogging application which reflect the design and problem-solving aspect of developing these sites. I am excited to be active in projects and use the developed knowledge and skills in practice throughout the internship.

SKILLS

JAVA, C, PYTHON

HTML, CSS, JAVAScript

Communication, Leadership,
Management

Problem solving

WORK EXPERIENCES

PROJECTS

DISCOVER INDIA:LAND OF DIVERSITY

2024

Discover India: Land of Diversity – Developed an interactive platform showcasing India's rich cultural, historical, and geographical diversity using Next.js and Material UI. Implemented features such as interactive maps, search & filtering, and visually appealing content to enhance user engagement. Focused on creating a user-friendly experience for travelers, students, and culture enthusiasts.

2048 GAME

2025

2048 Game – Developed an interactive 2048 puzzle game using HTML, CSS, and JavaScript. Implemented smooth tile animations, optimized game logic for performance, and ensured a responsive design for both desktop and mobile users. Focused on enhancing user experience with intuitive controls and engaging gameplay.

LE CAFE - ONLINE MENU

2024

Le Café – Online Menu – Designed and developed a responsive online menu for a café using React and Material UI. Implemented a user-friendly interface with dynamic filtering, category-based navigation, and an interactive ordering system. Focused on enhancing the digital dining experience with visually appealing layouts and smooth user interactions.
